CS4500 Weekly Management Report

Team <6>

Team <Team Code Blue>

<11/18/22>

Accomplishments

(Be specific – what was accomplished and who participated; bulletize response)

- **P6 :** Show latest recommendation button added with empty output and server not connected output
    - Alec
- **P5:** Still working on the caching system, sorting out some edge cases and improving it.
    - Scott
- **P3:** Preliminary graphing of statistics on the desktop app
    - Sam

Goals & Priorities

(List short- and long-term goals in decreasing order of importance; state who is primary responsible and when due)

Short-Term

- **P6 :** Discussing on how we can store the latest recommendation list, either store it in the flask server or the database server
    - November 27th (Alec)
- **P3:** Refine visualization of the GPU Metrics
    - November 27th (Sam)
- **P5** Caching for desktop application and extension
    - November 27th (Scott)
- **P2** Installation Process, Installer for desktop application - update to most recent build
    - November 27th (Scott)
- **DD3** Final Design Document
    - December 2nd (Scott)

- **UG2** Final User Guide
  - December 2nd (Scott)

Long- Term

- **P1** Optimizations to the model to better account user metrics
  - November 27th (Aaron)
- **P3** GPU utilization and metrics within desktop application
  - November 27th (Sam)
- **P6** Store latest recommendation to the server using ajax
  - November 27th (Alec)
- **P6** Implement Desktop UI Wireframes
  - November 27th (Sam)
- **P6** Implement updated extension UI Wireframes
  - November 27th (Max)
- **DEMO** Final Demos
  - December 9th (Scott)

Needs

NOTE THAT P5 was pushed back because it was seemingly harder than anticipated, the DD2 on the website should reflect this
